

What's New?

I hope to keep a running photo report of the maintenance and repair activity going on the Saturdays and Wednesdays. If anyone has pictures of the work progressing on the Wednesdays and wish them to be included please e-mail them to me. We have a large number of projects and repairs to be done this winter including re laying some major sections of track. Anyone who wishes to give a helping hand with any jobs large or small please see Malcolm the track secretary and will be only too pleased to find something for you. Apologies if I missed anything.

Progress report Week 47

The new cooker donated by David and Georgina Oxley has now had a splash back tiled and socket that were too close moved outside the kitchen area.

The gas bottles that will be stored outside has had a lockable cage built so they remain secure.

The kitchen area has also had the layout modified by Tony.

Graham nears completion on the club loco.

Point rods to control the station points are starting to come together.

The new steps over the steaming bay access track are complete

Leaf collection continues ready for the Santa Special open day on the 13th Dec (Please note all tickets are sold for this event)
