

What's New?

Progress report Weeks 5 - 17

Andrew begins the task of removing paint from the body of a club loco. As from previous reports you will have seen the loco undergoing mechanical alterations.

Paul cuts down the body into more manageable parts

Graham and Mike make final alterations to the electric tram engine. This engine will be entered into service in the new running season 2010

A hoist gantry that was found in the great clearout of 2009 is to be erected where it may be of some use rather than filling our store room

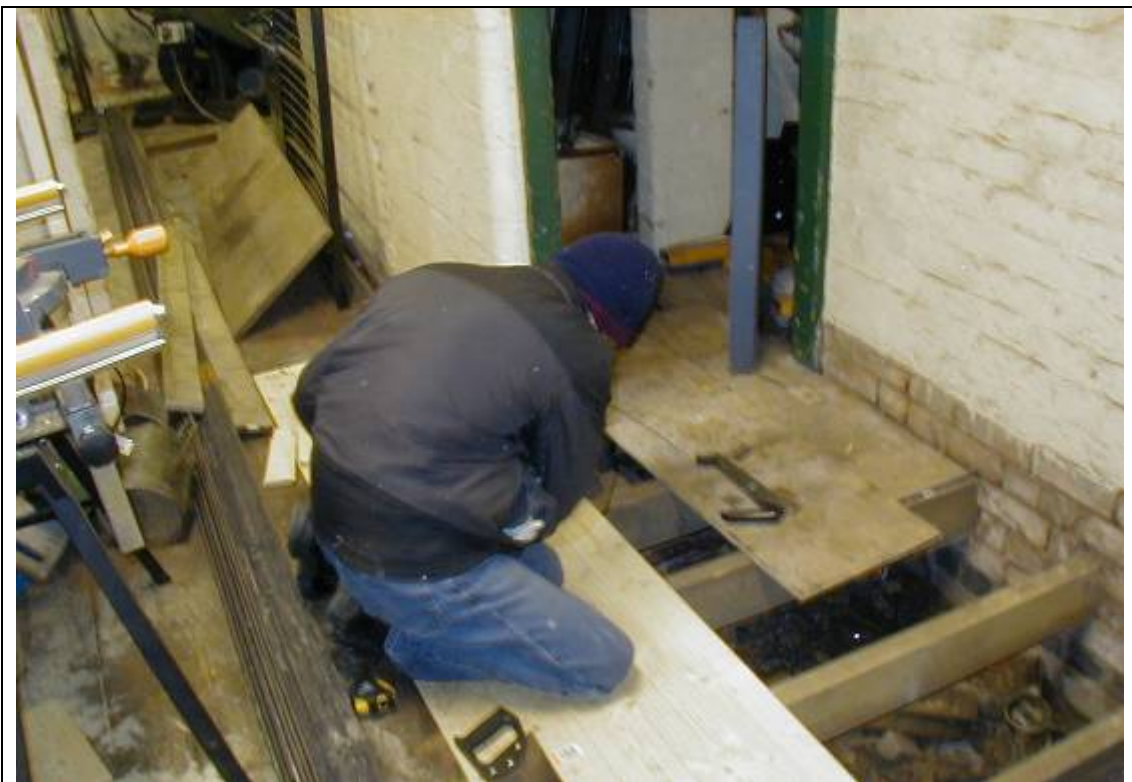

The new gantry painted and in place

Steve works on replacing the last of the timber on the top track. Work on the raised track should be complete for the 2010 running season

Throughout the winter the rotten floor in the Pavilion building has been replaced. Rob laying floor boards.

John laying floor boards form the other end of the room
